MATT EVANS

I've been creating art since I was old enough to hold crayons and clay. My life-long pursuit of creative expression has also been marked by a deep love of variety. Though I'm classically trained as a fine artist, I had a successful, 15-year career as a UI designer for Apple Computer, leaving me equally comfortable with Photoshop and acrylic paint. Over the years I've explored everything from puppets to animation. My artistic interests are varied and I often find ways to combine them, honing a range of skills that ultimately support one another. I'm always intrigued by novel and interesting projects.
